

Project Development Phase
Project Development Delivery of Sprint 3

Date	08 November 2022
Team ID	PNT2022TMID48721
Project Name	Project - Signs with smart connectivity for Better road safety
Marks	8 Marks

Objective :

- >> Write a python code for print the random temperature, Road signs, Speed limit, Message
- >> Simulate and Generate the data
- >> Display the published data in IBM Watson IOT Platform

Code for print the random temperature, Road signs, Speed limit, Message :

(RandomValues.py)

```
#include <WiFi.h> //library for wifi
#include <PubSubClient.h> //library for MQTT

void callback(char* subscribetopic, byte* payload, unsigned int payloadLength);

//-----credentials of IBM Accounts-----

#define ORG "k0y7f8" //IBM ORGANITION ID
#define DEVICE_TYPE "ESP32_CONTROLLER" //Device type mentioned in ibm watson IOT Platform
#define DEVICE_ID "BME280_SENSOR" //Device ID mentioned in ibm watson IOT Platform
#define TOKEN "Md22fj*aovUH7gy60x" //Token
String data3;
float dist;

//----- Customise the above values -----
char server[] = ORG ".messaging.internetofthings.ibmcloud.com"; // Server Name
char publishTopic[] = "iot-2/evt/Data/fmt/json"; // topic name and type of event perform and format in which
data to be send
char subscribetopic[] = "iot-2/cmd/test/fmt/String"; // cmd REPRESENT command type AND COMMAND IS TEST OF
FORMAT STRING

OpenWeatherMap - (Ex., karur, IN) :

The screenshot shows the OpenWeatherMap website interface. The browser address bar displays the URL `openweathermap.org/find?utf8=✓&q=salam`. The website header includes the OpenWeather logo and navigation links: Weather in your city, Guide, API, Dashboard, Marketplace, Pricing, Maps, Our Initiatives, Partners, Blog, For Business, jafer ..., and Support. The main content area features a search bar with the text "karur" and a "Search" button. Below the search bar, a dropdown menu shows the suggestion "karur,tn". The weather data for Karur, IN is displayed, showing a temperature of 27.8°C, a message of "few clouds", and geo-coordinates [10.95, 78.0833]. A note explains the search engine's flexibility, stating that the order of city name, comma, and country code is important. The Windows taskbar at the bottom shows the system clock as 22:57 on Wednesday, 16-11-2022.

Weather in your city

karur

karur,tn

Karur, IN few clouds

27.8°C temperature from 27.8 to 27.8 °C, wind 1.98 m/s, clouds 24 %, 1012 hpa

Geo coords [10.95, 78.0833]

Search engine is very flexible. How it works:

- To make it more precise put the city's name, comma, 2-letter country code (ISO3166). You will get all proper cities in chosen country. The order is important - the first is city name then comma then country. Example - London, GB or New York, US.

Python IDLE Output :

The screenshot shows the Python 3.6.5 Shell output window. The output displays several lines of published data, each containing a temperature, a message, a sign, a speed, and a visibility status. The data is as follows:

```
Published data Successfully: {'Temperature': 26.03, 'Message': 'EMERGENCY, HOSPITAL NEARBY', 'Sign': 'Speed Breaker', 'Speed': 'Limit Exceeded', 'Visibility': 'Clear Weather'}

Published data Successfully: {'Temperature': 26.03, 'Message': 'GO SLOW, SCHOOL / COLLEGE ZONE AHEAD', 'Sign': 'Right Diversion', 'Speed': 'Moderate', 'Visibility': 'Clear Weather'}

Published data Successfully: {'Temperature': 26.03, 'Message': 'PETROL BUNK NEARBY', 'Sign': 'Speed Breaker', 'Speed': 'Limit Exceeded', 'Visibility': 'Clear Weather'}

Published data Successfully: {'Temperature': 26.03, 'Message': 'EMERGENCY, HOSPITAL NEARBY', 'Sign': 'Speed Breaker', 'Speed': 'Slow', 'Visibility': 'Clear Weather'}

Published data Successfully: {'Temperature': 26.03, 'Message': '', 'Sign': '', 'Speed': 'Limit Exceeded', 'Visibility': 'Clear Weather'}

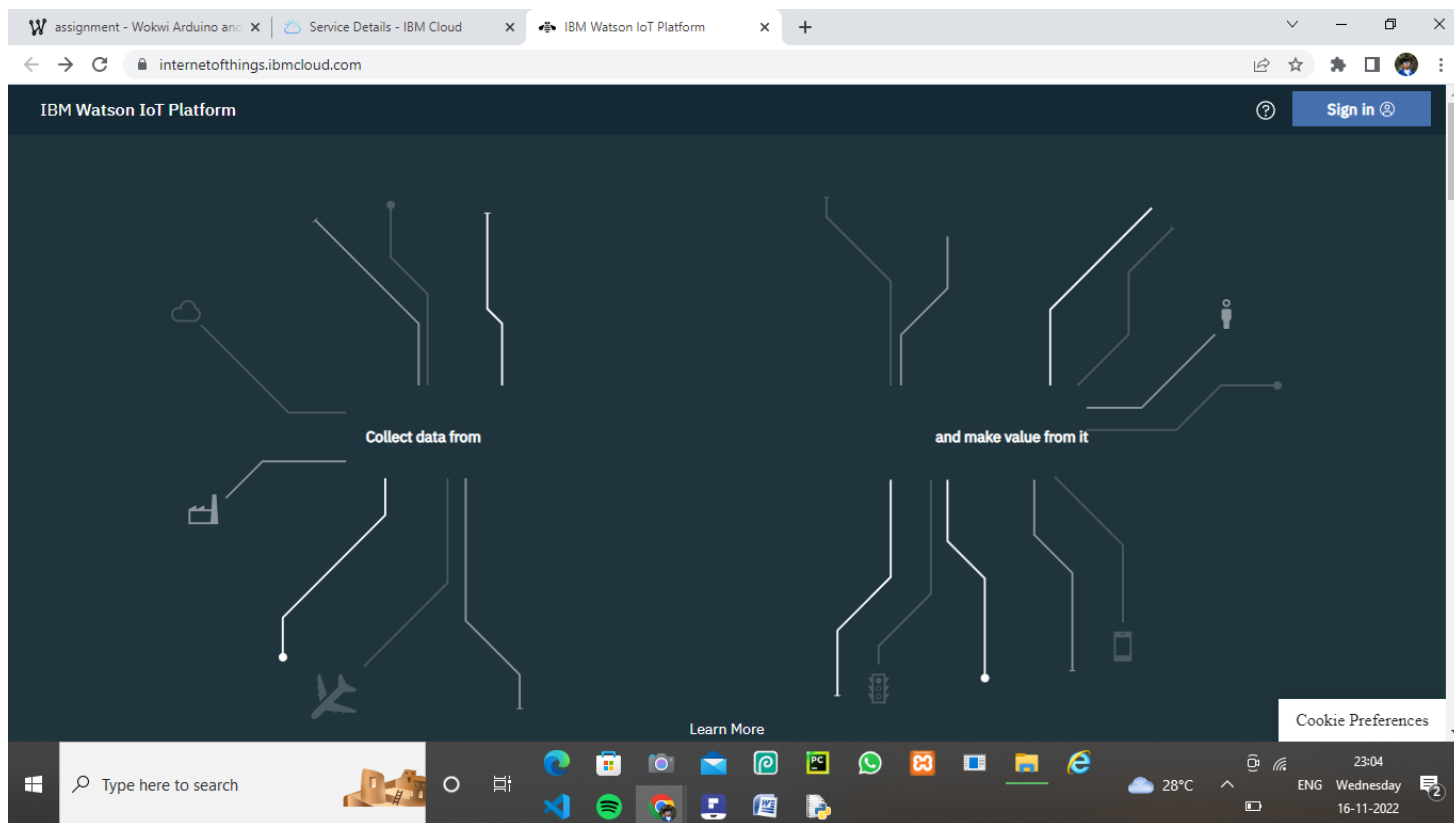

Published data Successfully: {'Temperature': 26.03, 'Message': 'EMERGENCY, HOSPITAL NEARBY', 'Sign': '', 'Speed': 'Moderate', 'Visibility': 'Clear Weather'}

Published data Successfully: {'Temperature': 26.03, 'Message': 'EMERGENCY, HOSPITAL NEARBY', 'Sign': '', 'Speed': 'Slow', 'Visibility': 'Clear Weather'}

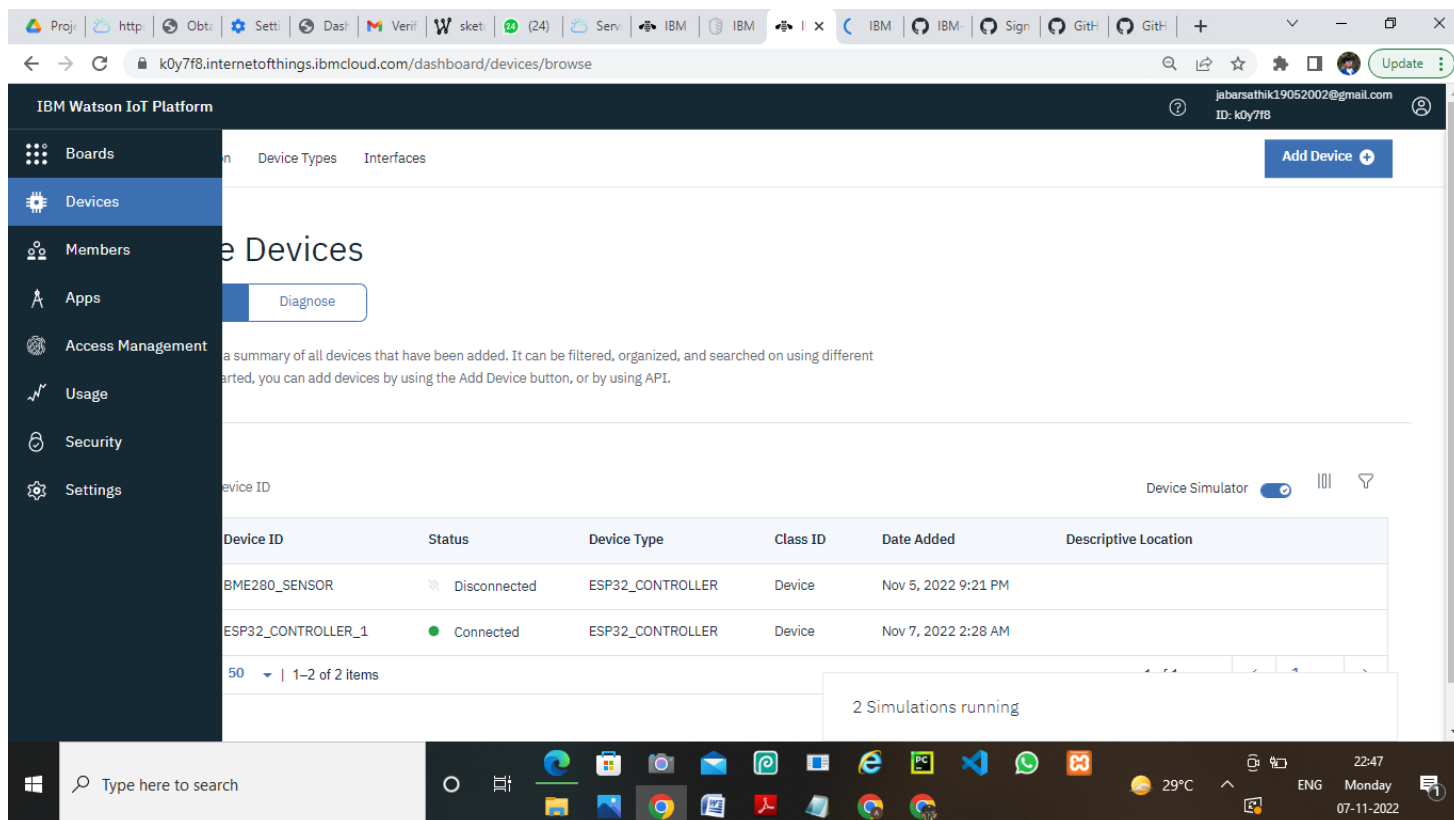

Published data Successfully: {'Temperature': 26.03, 'Message': 'NEED HELP, POLICE STATION AHEAD', 'Sign': 'Left Diversion', 'Speed': 'Moderate', 'Visibility': 'Clear Weather'}
```

The Windows taskbar at the bottom shows the system clock as 4:12 PM on 11/13/2022.

IBM Watson IOT Platform :

IBM Watson IOT Platform - Device Creation :

IBM Watson IOT Platform - Display the published data :

The screenshot displays the IBM Watson IoT Platform interface. The top navigation bar includes tabs for Browse, Action, Device Types, and Interfaces. A search bar labeled "Search by Device ID" is present. The main content area shows a table of devices, with one device selected: BME280_SENSOR, which is disconnected and of type ESP32_CONTROLLER. Below the device list, a panel titled "Recent Events" shows a stream of data events. The events are listed in a table with columns for Event, Value, Format, and Last Received. The events are labeled event_1 and contain random number values. A status message "2 Simulations running" is visible in the bottom right corner of the events panel.

Device ID	Status	Device Type	Class ID	Date Added	Descriptive Location
BME280_SENSOR	Disconnected	ESP32_CONTROLLER	Device	Nov 5, 2022 9:21 PM	

Event	Value	Format	Last Received
event_1	{"randomNumber":84}	json	a few seconds ago
event_1	{"randomNumber":96}	json	a few seconds ago
event_1	{"randomNumber":77}	json	a few seconds ago
event_1	{"randomNumber":50}	json	a few seconds ago
event_1	{"randomNumber":34}	json	a few seconds ago

2 Simulations running
